Guys,

MS has asserted that on PlayStation platforms (not sure how back they're classifying) that there are 240 exclusive games between 1P and 3P content that do not exist on Xbox.

[REDACTED]

Can you pull from [REDACTED] a list of all titles that exist on PS but that do not exist on Xbox.

Similarly, can you pull from [REDACTED] the inverse? That is to say, all Xbox games that do not exist on PlayStation?

I get that it'll likely [REDACTED] that's only US based (and thus [REDACTED] but that would at least give us a swag at ascertaining what these titles are.

Very sorry for the short notice and timelines here but any data you could easily get to would be helpful. Thanks

Hi Christian,

Here you go. I think this is what you're looking for. Please note that I only have back data for USA. If you need Canada then [REDACTED]

Just an FYI, I'm no longer working on [REDACTED] as I have moved on to run Biz Ops for our new PC group. Chris Stiller and Anthony Yee are handling [REDACTED] these days. I've cc'd them, so they should be able to give you what you need going forward.

Hope all is well...

Jerry,

Hope things are going well. I've got a quick inquiry for you.

Going into the way-back machine, could you pull projected units and dollars publisher and date of release/month of release for all PS2 titles and all PS3 titles [REDACTED]
